EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Morris Liss on 09/09/2005.

The following changes have been made:

- In claim 11, 18; "emits" has been changed to --scatters--.
- In claim 11, line 19; "being" has been changed to --a surface--.
- In claim 11, line 21; "being" has been changed to --said surface--.
- In claim 11, lines 22 and 23; "emitted from said protrusion" has been deleted.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

- As the closest reference, Katagiri et al (US 4,862,305) shows a tape cassette including: upper half and lower half connected each other, a light emitting section, wherein the tape cassette is utilized for an apparatus that is provided with a light emitting section for detecting a tape end of a magnetic tape, and a light receiving section 9 for detecting the tape end of the magnetic tape by receiving a detection light beam irradiated by the light emitting section wherein the detection light beam irradiated by the light emitting section reaches the light receiving section in a level of luminous energy exceeding a predetermined luminous energy level, and wherein a hole for a light path is formed on the tape

Art Unit: 2652

cassette composed of the upper and lower halves so as to pass the detection light beam irradiated by the light emitting section to the light receiving section, and a protrusion is formed; **but fails to show that** the protrusion is formed on outer side of the upper half above the hole for a light path and has a surface confronting the upper half and a surface perpendicular to the outside of the upper half, wherein the surface confronting with the upper half and the surface perpendicular to the out side of the upper half is roughed so as to scatter the light.

- Applicant asserts: the present invention is to provide a tape cassette, which can prevent an accidental detection of tape end of a magnetic tape in a VTR by preventing undesired light other than detection light having luminous energy exceeding a detectable level for light reception (Specification, p. 6).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tianjie Chen whose telephone number is 571-272-7570. The examiner can normally be reached on 8:00-4:30, Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa Nguyen can be reached on 571-272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
